

Etan Joseph Heyman

Front End Developer • US Citizen; No sponsorship required - **willing to move back to Israel**

New Orleans, LA 70002 • +1 (717) 962-9684 • etan@heyman.net

github.com/etanhey • [linkedIn.com/in/etanheyman](https://www.linkedin.com/in/etanheyman)

Coachable and highly motivated Front-End Developer with a strong work ethic and a proven ability to quickly learn new technologies. Experienced in developing dynamic web applications using Next.js and Tailwind CSS, as well as React.js with plain css and Node.js backend.. Adept at leading teams and managing projects to successful completion.

Work Experience

Software Engineer • Cantaloupe AI - Remote - New Orleans, LA

08/2024 - Present

Developed as part of a startup team, transitioning from React Native to Svelte, working closely with backend (Golang) and design teams.

- Migrated and enhanced an Expo/React Native application, improving user experience and streamlining interview management functionality.
- Built greenfield Svelte application with TypeScript, implementing responsive UI components from Figma designs.
- Developed and maintained production MVP using Bubble.io, enabling rapid iteration and successful customer acquisition.
- Collaborated with backend team to integrate Golang APIs, improving data flow and application performance.

Full Stack Developer & Project Lead • Weby - Remote - New Orleans, LA > Israel

11/2023 - 08/2024

Developed a front-end in a team, as a full-stack developer alone, and as a team leader for a group of full-stack developers in a company founded and run by graduates of the college I attended. Developed primarily using Next.js, Tailwind CSS, Cloudinary, and Mongoose.

- Developed a CMS system for a photographer according to Figma designs using Cloudinary.
- Developed two personal trainer landing pages, one of which has an idle timer that prompts the user to schedule an appointment.
- Currently developing an online candle store, enabling customers to send organized orders via a bot through WhatsApp.

Front End Developer • JAMSNext - Remote New Orleans, LA > California

12/2022 - 06/2023

Developed as part of a team of 3 junior developers, using Next.js, Redux, dnd-kit and .Net lambda for the backend.

- Developed the job tracker, a drag and drop board for applicants and recruiters to track their job applications and applicants.

Projects

Mayart an online candle store, enabling customers to send organized orders via a bot through WhatsApp.

Front end developed with React using typescript and tailwind according to a Figma design. Fetching customers data from a Node.js server built by a Weby's developer, using React-router-dom.
